

Wired Pharmacy Paging

BENEFITS

- Relieves congestion at the pharmacy counter
- Improves customer satisfaction with reduced wait times
- Increases efficiency with fewer interruptions
- Increases sales revenue while customers wait
- Improves employee satisfaction
- Visual-Display benefits hearing-impaired

FEATURES

The wired pharmacy paging systems offer users the ability to set entries to automatically delete after a set amount of time (1-99 minutes). This eliminates the need to remember to delete a page. In addition, the Model 4060 has a special feature which notifies the pharmacist if a prescription number has been skipped. After a specified amount of time, this feature displays numbers on the keypad screen that have been left out of sequence. This serves as a check to assure a customer's order has not been overlooked.

VISUAL-PAGER®

The Microframe® "Rx Ready" paging system allows customers to view a digital display to see when their prescription is ready. A number is assigned at the time the customer presents their prescription to be filled, and then the pharmacist will page them by placing their number in the Visual-Pager® display. By using Microframe's paging system, voice announcements and mispronunciation of customer names are eliminated. The system benefits the hearing-impaired and non-English speaking customers..

KEYPAD

The Model 4060 keypad powers the "Rx Ready" paging system. It is about the size of a hand-held calculator with easy to press keys and a small LCD display for number confirmation. It is powered by a 24V AC adapter. Up to 32 different keypads can be connected together allowing numbers to be entered and/or deleted from multiple locations.

DISPLAY CASES

All Microframe® displays are cased in attractive extruded aluminum cases with a red Plexiglas front panel. These cases are black anodized for scratch-resistant purposes. Displays can be purchased in optional single, double or triple-sided ceiling mounts. Either option can be ordered with mounting for T-Bar grid drop ceilings or a conduit mount.

9320 "Big Box" Visual-Pager®

Wireless Pharmacy Paging

BENEFITS

- Relieves congestion at the pharmacy counter
- Improves customer satisfaction with reduced wait times
- Increases efficiency with fewer interruptions
- Improves employee satisfaction
- Increases sales revenue while customers wait
- Visual-Display benefits hearing-impaired

FEATURES

The wireless pharmacy system by Microframe® offers easy installation. In combination with Microframe's exclusive MultiPage® transmitter, your wireless paging system is ready for use and future expansion without costly upgrades. The user may set entries to automatically delete after a set amount of time, or manually delete the numbers as needed. This eliminates the need to remember to delete a page.

VISUAL-PAGER®

The Model 3620 is designed to display up to six 1- to 2-digit numbers at a time. The display can rotate up to a total of 40 different numbers that are entered into the B3610 Multi-Number MultiPage® Transmitter (sold separately). The display has 2.5-inch tall digits viewable up to 80 feet. Unlimited wireless displays may be hung on the wall (or placed in ceiling mounts). Each display includes its own power adapter.

MULTIPAGE® TRANSMITTER

The MultiPage® drives the "RX Ready" wireless paging system. It is about the size of an office telephone with large keys and a small LCD display for number confirmation. A power adapter powers each component. An unlimited number of transmitters can be used with the system allowing numbers to be entered and/or deleted from each transmitter. The MultiPage® Transmitter has a ¼- to ½-mile range, and it operates with the 3620 and 3520 (2-digit displays) or 3430 or 3530 (3-digit displays). The displays are sold separately.

DISPLAY CASES

All Microframe® displays are cased in attractive extruded aluminum cases with a red Plexiglas front panel. These cases are black anodized for scratch-resistant purposes. Displays can be purchased in optional ceilings mounts - single, double, or triple-sided. Either option can be ordered with mounting for a T-Bar grid drop ceiling or a conduit mount.
